**Compilation Alan Storr 2006**

The information appearing in this compilation is derived from the collections of the Australian War Memorial and the National Archives of Australia.

**Author : Alan Storr**

Alan was born in Melbourne Australia in 1921.

He joined the RAAF in October 1941 and served in the Pacific theatre of war. He was an Observer and did a tour of operations with No 7 Squadron RAAF (Beauforts), and later was Flight Navigation Officer of No 201 Flight RAAF (Liberators). He was discharged Flight Lieutenant in February 1946.

He has spent most of his Public Service working life in Canberra – first arriving in the National Capital in 1938. He held senior positions in the Department of Air (First Assistant Secretary) and the Department of Defence (Senior Assistant Secretary), and retired from the public service in 1975.

He holds a Bachelor of Commerce degree (Melbourne University) and was a graduate of the Australian Staff College, 'Manyung', Mt Eliza, Victoria.

He has been a volunteer at the Australian War Memorial for 21 years doing research into aircraft relics held at the AWM, and more recently research work into RAAF World War 2 fatalities. This latter work is being progressively digitised by the AWM ..

He has written and published eight books on RAAF fatalities in the eight RAAF Squadrons serving in RAF Bomber Command in WW2. The contents of these books has been digitised by the Australian War Memorial, and appear on the AWM Roll of Honour website.

He is a member of Canberra Legacy.

**ACKNOWLEDGEMENT**

The Author acknowledges and thanks Kerrie Leech, currently Curator, Private Records, at the Australian War Memorial, for the great contribution she has made ensuring compatibility between my laptop and an AWM computer, so that research material on my laptop can be downloaded, and for her expertise in solving any computer problem that has arisen during the project. Without her contribution, the project would not have got off the ground.

## **SECOND WORLD WAR OVERVIEW : ROYAL AUSTRALIAN AIR FORCE**

The Royal Australian Air Force was expanding when war broke out, having 12 Squadrons formed, or in the process of forming. Most were located in Australia, but Australian airmen would end up serving in every theatres of war.

At the outbreak of war, 10 Squadron RAAF was in Britain collecting Sunderland flying boats purchased by the RAAF. The squadron was offered to Britain to serve as part of the Royal Air Force Coastal Command, flying anti-submarine patrols over the Atlantic Ocean for the duration of the war. 11 Squadron was stationed at Port Moresby with Catalina flying boats, flying long-range reconnaissance patrols over northern Australia and north of Papua New Guinea. In 1940, 3 Squadron was posted to the Middle East as an army co-operation squadron with the Australian Imperial Force, but became a fighter squadron.

Plans had been made to raise and send more squadrons overseas but the Australian Government then signed up to the Empire Air Training Scheme (EATS), under which the Royal Australian, New Zealand and Canadian Air Forces would train aircrews to be loaned to the Royal Air Force. Most would serve in British squadrons, though some would be posted to 'Article XV', or '400-series' squadrons. These squadrons were raised by the RAF but with their nationality officially recognised – for instance 460 Squadron RAAF, to which the famous Lancaster G for George at the Australian War Memorial belonged. Many aircrews who survived their tours of duty returned to Australia to serve in RAAF Squadrons as instructors.

Training of EATS recruits took place in Australia, Canada, Rhodesia and Britain. By war's end almost 40,000 Australians had been sent overseas under this scheme, serving in Europe, the Middle East, Burma and other places. Many men in Australia and overseas died in training accidents. Many who graduated from courses flew with Bomber Command, which had the highest operational loss rate of any British Commonwealth force in the war. The RAAF also sent ground crews to serve in most of the Article XV squadrons (as well as 3 and 10 Squadrons), most serving up to four years service overseas. Hundreds of RAAF members became prisoners of war in Germany and Italy, as well as a smaller number in the Far East.

The majority of RAAF personnel remained in Australia. The massive expansion of the forces required extensive administration, training, supply and maintenance services, and there was also a strong commitment to 'home defence', so many men and most women who volunteered for the RAAF never got a chance to serve overseas. To assist in meeting the demand for manpower within Australia, the RAAF formed the Women's Australian Auxiliary Air Force in 1941, recruiting women to serve in administrative roles and to perform routine maintenance on aircraft, serving alongside men, in non-operational units (mostly training establishments) in Australia.

In 1940, the RAAF sent three squadrons to Malaya; in 1941 these were joined by an Article XV squadron, 453, raised at Bankstown, New South Wales, along with some EATS graduates posted to British squadrons. They were the first to see action against Japanese forces. About 200 RAAF men, mostly ground staff, were taken prisoner by the Japanese. By the end of 1942, RAAF squadrons also had seen extensive operational service in northern Australia, the Netherlands East Indies and Papua New

Guinea. Other squadrons flew anti-submarine patrols over the shipping lanes around Australia. .

The majority of RAAF personnel who saw active service served in these campaigns against Japan. A few had previously served in Europe or the Middle East. Along with flying squadrons, RAAF members served in various supporting units including headquarters, supply depots, communications flights, medical aerial evacuation units, radar stations and airfield construction squadrons – some of the latter two types of units serving in the Philippines in 1945 with American forces. The RAAF also played a part in the repatriation of prisoners of war at the end of the war. The only RAAF servicewomen to see active service were members of the RAAF Nursing Service.

It was later established that the aircraft when outward bound at 19,000 feet was shot down by a night fighter and crashed at Wahlen, 4kmks south of Neustadt (Hessen). Five of the crew were killed and Sgt Williams and FO Gowlland were POW's.

Those killed are buried in the Hanover War Cemetery, Locality Niedersachsen, Germany.

Flt Sgt Gowlland later reported "After the aircraft was hit the Captain ordered 'prepare to abandon a/c'. I left my position in the nose with the intention of warning the WOP. The aircraft began spinning before I reached him and I was thrown out of the escape hatch left open by the Nav. The Engineer later said that the Pilot had ordered abandon A/c but the developed spin was strong. When the Engineer examined the wrecked aircraft next morning, five bodies were with the wreckage although the Captain had been thrown clear but was dead. All five were buried nearby at a small village near Neustadt."

**Summary:**

Halifax MZ581 took off from RAF Snaith at 2302 hours on the night of 20/21<sup>st</sup> July, 1944 detailed to bomb Bottrop, Germany. Nothing was heard from the aircraft after take off and it failed to return to base.

**Crew:**

RAAF 418427 FO Jowett, H A Captain (Pilot)  
RAF Sgt R G Hodgson, (Flight Engineer)  
RAAF FO Brown, K J (Navigator)

RAAF Flt Sgt A Laing, (Wireless Air Gunner)  
RAAF 437210 FO Lowe, R A E (Mid Upper Gunner)  
RAF Sgt K E C Adams, ((Rear Gunner)

MZ581 was hit by flak over the target area and the fins and rudders were severely damaged. Soon after the A/c collided with another aircraft, but control was regained and a course set for Woodbridge in Suffolk, UK. On the approach to Woodbridge MZ581 collided with trees and crashed near the runway. Three of the crew lost their lives. A later flying accident report stated “The collision occurred during night operations in the first phase. The crash occurred at night near a fully lit airfield. The collision resulted in loss of control and the Pilot made a gallant attempt to bring the damaged aircraft back to this country. It was suggested that the crew should have baled out before landing.” The Flt Engineer reported “While over the target area a collision occurred at 0135 hours between my aircraft and another 4 engined aircraft. No one was injured in the collision. After the collision the aircraft was flying starboard wing low and did so for the rest of the flight We eventually reached Woodbridge and decided to land. The Captain informed flying control of very little rudder control and permission to land was given. We made a normal approach and the crew were ordered to crash positions. During the approach the A/c swung to port, the Pilot corrected and the A/c swung again to port. I heard the engines being opened up and thought we were overshooting. The aircraft then hit trees and crashed. I escaped through the broken astro dome and the A/c caught fire.” The Navigator reported “The A/c crashed into pine trees east of Woodbridge. The Pilot had great difficulty controlling the A/c as the port fin and rudder were missing, large holes were in the fuselage and starboard main plane outboard of the starboard engine.”

FO Jowett, FO Cosgriff and FO Lowe (who died from his injuries) are buried in the Cambridge City Cemetery, Cambridgeshire, UK.

**Summary:**

Halifax MZ348 took off from RAF Snaith at 1502 hours on the 21<sup>st</sup> March 1945, detailed to bomb Rheine, Germany. Nothing was heard from the aircraft after take off and it failed to return to base.

**Crew:**

RAAF 426148 FO Paradise, J E Captain (Pilot)  
RAF Sgt R F Gunn, (Flight Engineer)  
RAAF 424584 PO Greenwood, B F (Navigator)  
RAF Flt Sgt A Armstrong, (Air Bomber)  
RAAF 424950 FO Berick, K W (Wireless Air Gunner)  
RAF Sgt W Hood, (Mid Upper Gunner)  
RAF Flt Sgt L Hart, (Rear Gunner)

The aircraft crashed on to farmland near Bevergern some 10kms NNE of Rheine. All the crew landed safely by chute but within 24 hours four of the crew had been shot. These four FO Paradise, Sgt Gunn, PO Greenwood and Flt Sgt Armstrong are buried at Reichswald Forest War Cemetery, Locality Kleve, Noordrhein-Westfalen, Germany. The cemetery is 5kms south west of Kleve.  
The other three crew members were POW's.

FO Berick alter reported "After leaving the target at 10,000 feet the A/c was bombed by A/c above it. One bomb fell through the wing just aft of the port nacelle, The port fin was knocked off and the rudder controls were useless. The A/c lost height rapidly. All except the Rear Gunner were not injured and I was unsure about the Rear Gunner. I baled out at 9000 feet . The others were still in the A/c. I was captured immediately and have no news re the others. I saw the Captain at the Gestapo.

In December 1945 a War Crimes investigation report stated " the three perpetrators are known and the evidence against them is complete. We are trying to locate the three one of whom is in Russian held territory to bring them to justice."

RAF Sgt E W Weston, (Mid Upper Gunner)  
RAF Sgt D C Martin, (Rear Gunner)

It was established that the aircraft crashed at 1830 hours between the towns of Geldern and Sevelin both being west of the Rhine and on the north west of the Ruhr approaches.

FO Grose was killed and the remaining six crew members were POW's.

FO Grose is buried in the Reichswald Forest War Cemetery, Locality Kleve, Nordrhein-Westfalen, Germany. The cemetery is 5kms south west of Kleve.

Flt Sgt Reynolds later reported "On the afternoon of 11 September we set out to attack an oil refinery at Gelsenkirchen. About 3 minutes from the target we were badly hit by flak and the petrol tanks caught fire. Despite this the Captain flew the plane in to bomb and then on his orders the rest of the crew baled out. I was the last to leave and the Captain should have followed me through the escape hatch. But once we were clear I think he tried lift the burning A/c over the American lines about 25kms away and so avoid capture. Before he could manage this the port wing fell off and the plane crashed. He was not wounded when we baled out."

MZ581 was hit by flak over the target area and the fins and rudders were severely damaged. Soon after the A/c collided with another aircraft, but control was regained and a course set for Woodbridge in Suffolk, UK. On the approach to Woodbridge MZ581 collided with trees and crashed near the runway. Three of the crew lost their lives. A later flying accident report stated “The collision occurred during night operations in the first phase. The crash occurred at night near a fully lit airfield. The collision resulted in loss of control and the Pilot made a gallant attempt to bring the damaged aircraft back to this country. It was suggested that the crew should have baled out before landing.” The Flt Engineer reported “While over the target area a collision occurred at 0135 hours between my aircraft and another 4 engined aircraft. No one was injured in the collision. After the collision the aircraft was flying starboard wing low and did so for the rest of the flight We eventually reached Woodbridge and decided to land. The Captain informed flying control of very little rudder control and permission to land was given. We made a normal approach and the crew were ordered to crash positions. During the approach the A/c swung to port, the Pilot corrected and the A/c swung again to port. I heard the engines being opened up and thought we were overshooting. The aircraft then hit trees and crashed. I escaped through the broken astro dome and the A/c caught fire.” The Navigator reported “The A/c crashed into pine trees east of Woodbridge. The Pilot had great difficulty controlling the A/c as the port fin and rudder were missing, large holes were in the fuselage and starboard main plane outboard of the starboard engine.”

FO Jowett, FO Cosgriff and FO Lowe (who died from his injuries) are buried in the Cambridge City Cemetery, Cambridgeshire, UK.

Sgt Riley later reported “ Before reaching the target the port was hit by flak. We continued on and the target was bombed. At 0340 hours on 17<sup>th</sup> April whilst turning on to the last leg of the trip to England we were attacked by a night fighter. Clememts informed the Captain that something was happening to the starboard engine. Then there were several explosions in the bomb aimers compartment possibly by cannon shells. I spoke to the Captain over the I/C and asked him if he could hold the plane which was weaving violently. He replied “No No, get out get out”. I was standing besides Lancaster when the order to abandon was given. As he did not have his I/Com on I assisted him to prepare to abandon. Lancaster fell away from the A/c very well without any apparent injury. I followed him but did not see his chute open when I descended. On landing I saw the crashed A/c about 150 yards away but did not approach owing to a civilian in the vicinity. I did not see Lancaster again. I landed in a very heavily wooded are of the Marne district France.”

The aircraft crashed on to farmland near Bevergern some 10kms NNE of Rheine. All the crew landed safely by chute but within 24 hours four of the crew had been shot. These four FO Paradise, Sgt Gunn, PO Greenwood and Flt Sgt Armstrong are buried at Reichswald Forest War Cemetery, Locality Kleve, Noordrhein-Westfalen, Germany. The cemetery is 5kms south west of Kleve.  
The other three crew members were POW's.

FO Berick alter reported "After leaving the target at 10,000 feet the A/c was bombed by A/c above it. One bomb fell through the wing just aft of the port nacelle, The port fin was knocked off and the rudder controls were useless. The A/c lost height rapidly. All except the Rear Gunner were not injured and I was unsure about the Rear Gunner. I baled out at 9000 feet . The others were still in the A/c. I was captured immediately and have no news re the others. I saw the Captain at the Gestapo.

In December 1945 a War Crimes investigation report stated " the three perpetrators are known and the evidence against them is complete. We are trying to locate the three one of whom is in Russian held territory to bring them to justice."

<b>Aircraft Type:</b>	Wellington

**Summary:**

Wellington P9228 crashed at 0827 hours on 13 August 1943 one mile north west of Lakeheath village Suffolk, and about 11 miles east of Ely. It collided with Spitfire P7530.

P9228 took off at 1005 hours with an instructor and 4 experienced air gunners on board Including FO Wood who was on a Gunnery Leaders course. Another Wellington and Spitfire P7530 took off about the same time. All three aircraft were detailed to carry out quarter attacks. During the exercise while the leading Wellington was being attacked by the Spitfire, P9228 started changing position from port to starboard. At the time P9228 was slightly to the rear and to starboard, and the Spitfire when breaking away downwards and to also to starboard collided with P9228. The starboard wing of the Spitfire caught the starboard wing of P9228 and the Spitfire burst into flames and the Wellington dived to earth. Both aircraft crashed about one quarter of a mile from each other.

An accident report later stated “The primary cause of the accident was that the Spitfire pilot misjudged his forward momentum on the break away. A contributory cause was the Wellington changed over its position whilst the Spitfire was committed to the attack thus confusing the Spitfire pilot. Before recovery could be made the aircraft collided.”  
The crew of both aircraft were killed.

<b>Unit:</b>	ATTD 55 SQN RAF

**Summary:**

Blenheim V6228 detailed to carry out a high level bombing attack on Gambut aerodrome, took off at 0525 hours GMT with 2 other aircraft in V formation, accompanied by five aircraft from 113 Sqn RAF. The force began its run up to the target from 40 miles out to sea at a height of 15,000 feet. Bombs were dropped at 0714 hours GMT, and V6228 turned right and headed north out to sea in a gradual dive.

The formation was then attacked by 4 ME109's, and V6228 was hit in the port wing by cannon shells and by machine gun bullets just forward of the gun turret. The aircraft lost speed and height and as it went down Sqn Ldr Blackmore waved on the other two aircraft. V6228 was last seen to land on the water approx 40 miles north of Gambut, while 2 ME109's circled overhead at approx 200/200 feet.

**Crew:**

RAF Sqn Ldr Blackmore, H G P Captain (Pilot)  
RNZAF Sgt W D Cole, (Observer)

Extract from Hqrs. Bomber Command Routine Order, Serial No A161 of 6/10/43.

“The Commander-in-Chief wishes to bring to the notice of all ranks in the command the courage and devotion to duty displayed by the undermentioned members of a crew of No 57 Sqn on the night of 22/23<sup>rd</sup> Sept. 1943, when returning from an attack on Hanover.

A413078 PO G A Duff, Pilot and Captain

A417232 Flt Sgt W Pryde, Rear Gunner

A Lancaster A/c captained by PO Duff was attacked by an unidentified enemy A/c at 4000 feet, while in the circuit at Base. The A/c was set on fire by the fighter's first burst and a violent explosion occurred in the port wing. PO Duff succeeded in retaining control of the A/c which was burning along the port wing and almost unmanageable. The Bomb Aimer and Flight Engineer baled out safely at 2000 and 1000 feet respectively. PO Duff remained at the controls and succeeded in keeping the A/c level until at 1000 feet it made a tight turn and dived into the ground. The two members of the crew who landed safely undoubtedly owe their lives to PO Duff's efforts to give his crew the chance to abandon the A/c. Throughout the entire incident, Flt Sgt Pryde engaged the enemy A/c with fire from the rear turret and was seen to be still firing as the A/c went into its last dive.”

The Citation for the award of DFC to PO McPhie is as follows :  
PO McPhie has taken part in many successfully attacks against strongly defended targets in Germany. On one occasion during an operation over Berlin, his aircraft was attacked by an enemy fighter and, in the ensuing engagement, this officer's skilful airmanship was responsible for bringing his own aircraft through unscathed. At all times he has set a fine example of efficiency, courage and determination. (London Gazette 1/6/1945 P2793)

A Lancaster A/c captained by PO Duff was attacked by an unidentified enemy A/c at 4000 feet, while in the circuit at Base. The A/c was set on fire by the fighter's first burst and a violent explosion occurred in the port wing. PO Duff succeeded in retaining control of the A/c which was burning along the port wing and almost unmanageable. The Bomb Aimer and Flight Engineer baled out safely at 2000 and 1000 feet respectively. PO Duff remained at the controls and succeeded in keeping the A/c level until at 1000 feet it made a tight turn and dived into the ground. The two members of the crew who landed safely undoubtedly owe their lives to PO Duff's efforts to give his crew the chance to abandon the A/c. Throughout the entire incident, Flt Sgt Pryde engaged the enemy A/c with fire from the rear turret and was seen to be still firing as the A/c went into its last dive.”

**Summary:**

Liberator BZ724 took off from RAF Ballykelly at 1143 hours on 17<sup>th</sup> August 1944 to carry out a night anti-sub search. The aircraft crashed at Helmsdale at about 0440 hours on 18<sup>th</sup> August about 17 hours after take off.

At 2125 hours the aircraft received a signal diverting it to Tain on its return and to arrive there before 0345 hours on 18<sup>th</sup> August some 16 hours after take off. The course was set for Tain on leaving the patrol. The aircraft arrived over Witton and though it was Wick. As the Captain was not sure of the suitability of the Wick airfield to land a Liberator, he decided to go to Tain which he knew. He was warned by the Engineer that the fuel was getting low but he had not expected the shortage to be critical. When coming into Tain on a QDM the aircraft lost power on one or more engines swerved, lost height and crashed into a hill at a height of 1000 feet. The weather and visibility were good at the time.

<b>Unit:</b>	ATTD 61 SQN RAF

**Summary:**

Lancaster LM360 took off from RAF Syertston at 1659 hours on the night of 3/4<sup>th</sup> November 1943 detailed to bomb Dusseldorf, Germany. The aircraft returned home with the Pilot unconscious, the Navigator dead, and two of the crew wounded. The control panel was smashed, the hydraulics out of order, one rear gun could be operated only manually, the inter-com was U/S and the oxygen supply had failed.

The Pilot, Flt Lt Reid was hit when the aircraft was first damaged by machine gun fire from a ME110, ten minutes after the Dutch coast was crossed. He flew on to Dusseldorf, no other member of the crew knowing he was wounded. Then he collapsed and was unconscious most of the way home, but recovered sufficiently to land the aircraft. While the Pilot was unconscious, the aircraft was piloted by the Flight Engineer, Flt Sgt Norris, who was also wounded and had to be assisted by the Bomb Aimer.

The A/c was first attacked by an ME110 which came astern from 250 yards, both the rear and mid upper gunners fired and claimed to have scored hits. A few minutes later a FW190 attacked from the port beam and racked the whole of the fuselage with cannon shells. The rear gunner's turret was out of order after the first attack and one gun could only be fired manually. After the second attack the mid upper gunner's turret was out of order and his oxygen and electric supplies cut off. He came out of the turret and found the Wireless Operator, lying full length over the dead Navigator.

After the first attack the crew gave all the oxygen to the Pilot who was navigating by the stars. After the bombs were dropped over the target, the A/c went into a dive, and the engineer pulled the Pilot off the stick and levelled the aircraft. The Bomb Aimer states that that was the first he knew of anyone being wounded. When he found that the Navigator was dead, he went to the turret but all that were left of the instruments was one pencil and a pad. He then went to assist the Engineer. On the way back from the target the Flight Engineer and the Bomb Aimer had great difficulty controlling the aircraft which occasionally went into a dive and lost nearly 6000 feet in height.

The Pilot several times regained consciousness and on finding an airfield over England he revived sufficiently and did everything possible for a perfect landing. Having no flaps the crew had to use the emergency equipment but when the wheels touched down they collapsed and a belly landing had to be effected. The Wireless Operator died in hospital

the following morning. The Flight Engineer who had shrapnel wounds in the shoulder and left arm, did not reveal he was wounded until he was climbing out of the aircraft.

PO Brady of 215 Sqn RAF has taken part in many attacks against strongly defended targets in Burma. On one occasion in April 1944, during a sortie against Rangoon, his aircraft was severely damaged by two enemy night fighters. The Air Bomber and Rear Gunner were both wounded and were unable to return the fire. PO Brady however by skilful handling of his aircraft prevented further enemy attacks and set a course for base. With one of the engines practically useless and the hydraulic system completely out of action, he made a masterly crash landing. PO Brady is a skilful and determined pilot who has always performed his duties with great keenness and efficiency."

KG457 set course in company with a Hurricane escort, which turned back after 20 minutes due to the weather. The Dakota did not turn back and failed to return from the mission. Initial searches found nothing, and search operations were suspended for many years due to a civil war in Burma.

In August 1954 the Army reported it had found a wreck and five bodies not far from Kalam and 2 miles south west of Roshi near Falam. The aircraft had crashed in wild country in the Chin Hills near the northern boundary of India and Burma in position 23 deg north 93.29 east. It was presumed that the aircraft had flown into a hillside in cloud during monsoon conditions.

The Citation for the award of DFC to PO Bennet is as follows :

PO Bennett of 69 Sqn RAF has completed a considerable number of highly successful low level night reconnaissance sorties, often in the face of intense enemy fire. At one period he carried out four sorties in four nights and on each occasion his aircraft was hit by anti-aircraft fire. Although he had to complete his reconnaissance at a very low level, he brought back most valuable information. PO Bennett's unfailing courage and devotion to duty have set an outstanding example to the whole squadron.

The Citation for the award of DFC to FO Thorpe is as follows :

FO Thorpe has proved himself to be a successful and resourceful night reconnaissance pilot. He has consistently brought back valuable information. During a recent night attack, his aircraft was hit by anti-aircraft fire, severing the aileron control and damaging the wing. By skilful flying he brought his aircraft back to base where he executed a masterly landing. FO Thorpe's enthusiasm and efficiency have set a fine example to all. Four of the crew were killed and FO Knyvett became a POW.

FO Knyvett was released from a prison camp in Bulgaria on 23/9/1944 and reported "the aircraft was shot down in flames by an unseen night fighter. It was in flames when I baled out and am almost certain the other four were killed. I fractured a leg and was captured on landing.

As Bulgaria was occupied by Russian forces, it was not possible to establish until 1947 that the aircraft crashed at Novgarad, Roumania.

The four who lost their lives are buried in the Sofia War Cemetery, Bulgaria.

Both Flt Sgt Wills and Sgt Holmes survived the crash, and the other three crew members were killed. Those killed are buried in the Bari War Cemetery, which is on the outskirts of Bari, Locality Carbonara, Italy.

Flt Sgt Wills later reported “After attacking the target we set course for base. The Rear Gunner reported that one or two bombs were hung up. We changed course to jettison the bombs over the Adriatic Sea. On return we made landfall in the Bari area, but owing to considerable cloud we had difficulty in pinpointing our position. At the request of the Navigator we lost height to about 1500 feet and almost immediately after the aircraft crashed into a hillside. Three of the crew were killed, the Rear Gunner who was uninjured was thrown clear and I suffered serious injuries and was taken to hospital.”

The crash occurred at 0628 hours 16 miles south of Corato.

**Summary:**

Wellington MK247 took off from base at 2050 hours on 7<sup>th</sup> May 1943, to bomb enemy concentrations on roads south east of Tunis.

The aircraft returned with engine trouble and the Captain contacted base by R/T to get instructions re the jettison of bombs. He was instructed to jettison half the load 5 miles south east of the Landing Ground which he did.

On returning to base the aircraft made a circuit and the engines appeared to be running normally. The aircraft was given the green light and it was acknowledged. On going cross wind to the upwind end of the flare path, the aircraft was seen to dive losing considerable height. The aircraft then levelled and continued at the same height of approx 600 feet, until on the cross wind leg downwind from the flare path. It was then seen to lose more height and continued to fly on at an extremely low altitude until it hit the ground and exploded. It crashed 3 miles from the flare path and was completely destroyed, The accident occurred at 2156 hours.

Five of the crew were killed and Flt Sgt Smith survived the crash.

LK958 crashed near Luckstedt, 19 miles north west of Stendal, Germany. Five of the crew were killed and Sgt Buchan and Flt Sgt Curry were POW's. Those killed are buried in the Berlin 1939-1945 War Cemetery, Germany.

In a later report Flt Sgt Curry stated "We were attacked by an enemy fighter in the target area. The aircraft was out of control with the starboard engine on fire and also the overload petrol tank and bomb bay. The Captain ordered 'bale out quickly', and this was acknowledged. I was the first to leave at about 16,000 feet. The others were still in the aircraft. I was captured after 24 hours by the German police."

Sgt Buchan reported " the aircraft was attacked at 18,000 feet and badly damaged. The starboard inner was hit and the aircraft was on fire. The Captain ordered bale out. No one was injured. The escape hatch was opened by the Navigator and the WOP went out. The aircraft went into a spin. I managed to put on my chute but could do nothing owing to the centrifugal force. After the aircraft dropped some thousands of feet it blew up and I was blown out. The only other crew member I saw was Curry."

It is a joint Citation with the award of the DFM to Flt Sgt Blockley, RAF.

This officer and airmen were pilot and rear gunner respectively of an aircraft detailed to attack Nuremburg one night in March 1944. On the outward flight, Flt Sgt Blockley sighted a fighter coming in to attack and promptly warned his pilot. Coolly and skilfully FO Sinclair manoeuvred to a good position from which Flt Sgt Blockley delivered a burst of machine gun fire which hit the enemy aircraft causing it to explode. FO Sinclair then resumed his course to the target and executed a successful attack. This officer and airmen displayed much skill and excellent co-operation and proved themselves to be valiant members of aircraft crew. They have completed many sorties. **Summary:**

Halifax LW636 took off from RAF Holme-on-Spalding Moor at 2336 hours on the night of 1/2<sup>nd</sup> March 1944, detailed to bomb Stuttgart, Germany. About two minutes after take off the aircraft stalled and spun in about one and a half miles up wind of the runway, and all the crew were killed.

**Crew:**

RAF Sgt G H Hawkins, (Flight Engineer)  
RAF PO Flitcroft, F C (Navigator)  
RCAF PO R Sirluck, (Air Bomber)  
RAF Sgt R C Bates, (Wireless Air Gunner)  
RAF Sgt R Tipaldi, (Mid Upper Gunner)  
RAAF 423427 Flt Sgt C A Rye, (Tail Gunner)

The aircraft had taken off with a load of incendiaries. A Court of Enquiry concluded that the crash occurred due to an error by the pilot in pulling up the aircraft flaps when the undercarriage was still down. Also falling snow may have contributed by adhering to parts of the plane and making it more easy to stall..

Flt Sgt Richards, Flt Sgt Sirluck, Flt Sgt Rye and Sgt Bates are buried in the Harrogate (Stonefell) Cemetery, Yorkshire, UK.

Sgt Hawkins is buried in the Harrow (Pinner) New Cemetery, Middlesex, UK.

PO Flitcroft is buried in the Stockport Borough Cemetery, Cheshire, UK.

Sgt Tipaldi is buried in the Corby Cemetery, Northamptonshire, UK.

Joint Citation with the award of the DFC to PO W C Ellis, RAF

One night in July 1943, these officers were pilot (Shannon) and wireless operator air gunner respectively of an aircraft detailed to attack Essen. When nearing the target, one of the port propellers was shattered and the engine caught fire. In spite of this, Flt Lt Shannon went on to make a successful bombing run. The wireless apparatus was unserviceable as the aerials had been destroyed but PO Ellis resourcefully erected an emergency aerial and thus was able to re-establish contact with base and obtain bearings which proved to be of material assistance to his pilot on the return flight. Both these officers displayed great skill and tenacity, setting an excellent example.

A 1946 report by a Missing Research & Enquiry team stated “ A local priest reported that an aircraft was seen at approx 1am approaching from the direction of Bruchsal flying at a very low altitude. It crashed in swampy ground between the villages of Rheinhausen and Oberhausen, Germany.” All the crew were killed and they are buried in the Durnbach War Cemetery, Locality Bad Tolz, Bayern, Germany. Durnbach is a village 16kms east of Bad Tolz, a town 48kms south of Munich.

**Citation :**

The Citation for the CGM awarded to Flt Sgt Mathers is as follows :

“One night in June 1943, Sgt’s French and Speedie were the Wireless Air Gunner and Rear Gunner respectively of an aircraft piloted by Flt Sgt Mathers, which attacked Mulheim. Whilst over the target area the bomber was subjected to heavy fire from the ground defences and repeatedly hit. Two engines were rendered unserviceable in quick succession, while the starboard aileron control was shot away and three petrol tanks were pierced, all of which leaked rapidly. In spite of this, Flt Sgt Mathers flew clear of the defences and set course for this country. On the return flight, the bomber gradually lost height and all moveable equipment, including the guns of the mid upper turret and some ammunition were jettisoned. Shortly after crossing the enemy coast the disabled aircraft was intercepted by an enemy fighter. In the ensuing engagement Sgt Speedie successfully used his guns and eventually with a devastating burst from close range, he shot the attacker down into the sea. The bomber was down to 500 feet but, displaying superb

airmanship Flt Sgt Mathers, receiving much assistance from Sgt French who diligently worked the wireless apparatus to obtain direction fixes, struggled on to reach an airfield near the coast. Although the undercarriage could not be lowered, this Pilot successfully effected a crash landing. In most harassing circumstances Flt Sgt Mathers displayed exceptional skill, courage and fortitude, while Sgt's French and Speedie displayed conduct worthy of the highest praise."

Joint citation with the award of DFM to Sgt W J Bailey, RAF.

One night in July 1944. FO Buchanan and Sgt Bailey were captain and flight engineer respectively of an aircraft detailed to attack a target in Northern France. After the enemy target had been bombed, the bomber was attacked by an enemy fighter and sustained severe damage. Fire broke out within the aircraft and an explosion occurred in Sgt Bailey's compartment wounding him in both legs. Disregarding his injuries, this airman fought the fire until the flames ere quelled. Meanwhile FO Buchanan who had been severely burned about the face flew the aircraft on a level course. This officer and airman

have completed many sorties and have, at all times, displayed courage fortitude and determination of a high order. (London Gazette 22/9/1944, page 4393)

**Summary:**

Halifax W7662 took off from RAF Croft at 2254 hours on the night of 3/4<sup>th</sup> May 1942, detailed to bomb Hamburg, Germany. Nothing was heard from the aircraft after take off and it failed to return to base.

**Crew:**

RAAF    400588 PO Hedge, A W Captain (Pilot)  
RAF    Sgt D W Drew, (2<sup>nd</sup> Pilot)  
RAF    Sgt F R Hipwell, (Flight Engineer)  
RAF    Sgt J Hewitson, (Observer)  
RAF    Sgt J A Lloyd, (Wireless Air Gunner)  
RAAF    406548 PO Copeland, G W (Mid Upper Gunner)  
RAF    Sgt J E Hanna, (Rear Gunner)

The aircraft crashed at Lunburg Heath and six of the crew were killed with Sgt Hanna being a POW. Those killed are buried in the Hamburg War Cemetery, Germany. The Cemetery is situated in a large civil cemetery known locally as the 'Ohlsdorf Cemetery'

Sgt Hanna later reported : "The aircraft was hit during enemy action and Sgt Hewitson was wounded. I heard the Captain tell PO Copeland to attend to the wounded man. Hewitson was badly wounded in two places. Soon after one of the engines caught fire and the Captain gave the order to adjust Hewitson's chute and get him clear of the aircraft. Shortly the Captain ordered abandon A/c which I did. I saw the aircraft crash and I think I saw one of the wings come off, which may account for the others failing to escape."

RAF        Sgt J E Ward, (Mid Upper Gunner)  
RAAF      410221 Flt Sgt E E Deverell, (Rear Gunner)

JD453 was shot down by the dual efforts of flak and night fighters and crashed.  
Sgt's Collins, Evans and Flt Sgt Deverell were killed and the others were POW's.

Those killed are buried in the Rheinberg War Cemetery, Locality Kamp Lintfort, Nordrhein-Westfal, Germany. Rheinberg is 24kms north of Krefeld and 13kms south of Wesel.

W R Chorley records that "Sgt Hunt was so incapacitated that he was unable to put his chute on. Sgt Collins then left the controls and assisted the Flight Engineer to bale out of the stricken aircraft. He then returned to his cockpit to hold the aircraft level. This courageous act undoubtedly helped others to get out, but he was unable to make good his escape."

The POW's later stated "the inter com was damaged when the A/c was hit and the bale out order was given by the call light. They had no knowledge of the fate of Deverell."

Halifax JD872 took off from RAF Brighton at 1933 hours on the night of 5/6<sup>th</sup>  
September 1943, detailed to bomb Mannheim, Germany.. Nothing was heard from the  
aircraft after take off and it failed to return to base.

**Crew:**

RAAF 414129 PO Ebeling, F C Captain (Pilot)

RAF PO H W Milligan, (Navigator)  
RAF Sgt H Salter, (Air Bomber)  
RAF Sgt P Groom, (Wireless Air Gunner)  
RAF Sgt W R Huntley, (Mid Upper Gunner)  
RAF Flt Sgt H J Pratt, (Rear Gunner)

The aircraft crashed at St-Hilaire-le-Grand (Marne), 20 miles east of Rheims, France, and  
all the crew were killed except Sgt Salter who survived the crash and evaded capture.  
Those killed are buried in the Choloy War Cemetery, Locality Meurthe-et-Moselle,  
France. Choloy is a village 28kms west of Nancy and 5kms west of Toul a town on the  
N24 road from Paris to Nancy.

Sgt Salter later reported “Outward bound the trip was uneventful until 5 minutes from the  
target area. The aircraft was attacked without warning from head on starboard bow and  
below by an unseen fighter. Height was 19,000 feet. I had been preparing to put the  
aircraft on to the bombing run and it was flying straight and level. Strikes were observed  
in the port wing and a small fire started. The Mid Upper gunner reported a large part of  
the port rudder had been shot away. The aircraft appeared to stall and the Captain gave  
the order ‘prepare to abandon’. The aircraft was brought under control and the order was  
cancelled. The Captain ordered the bombs to be jettisoned which was done in the outer  
ring of the target area, and the aircraft then turned on a course for home. About 3000 feet  
in height had been lost during combat and the aircraft continued at 16,000 feet. In order  
to keep the aircraft straight and level it was necessary full right rudder continuously. The  
fire in the port wing had gone out and all engines were running.

About one hour after combat at approx 2330 when the a/c was about 100 miles into  
France, the Flight Engineer said he was going aft to change tanks. He changed over to the

port tanks after reporting that the port gauges were U/S as they were showing zero reading for tanks that were presumably full. The two port engines immediately cut and it was evident that the tanks were in fact empty having been holed in the fighter attack. The pilot thought the A/c was going into a spin and the abandon order was given. I opened the front escape hatch and jettisoned it while the pilot put the A/c into a steep dive. The A/c went into a spin and the lights went out just as I prepared to leave. The A/c was spinning violently in a steep dive and I was thrown out. I suddenly found my feet go through the open hatch and I pushed my way out. The chute opened and I landed safely in 5 to 10 seconds only some 50 yards away from where the A/c crashed and burnt furiously, with all equipment being destroyed. All the others were killed in the crash.”

Flt Sgt Skidmore later reported “After bombing we were picked up by searchlights between Cologne and Dusseldorf. We were then hit by flak which I believe killed the Navigator. Upon the first attack by a night fighter, I was out from the I/Com and also the oxygen tube had come off my face mask. At the time of the attack I was putting out window down the flare chute but was told to stay where I was by the pilot. After the second attack I got in my turret but it was no use as my clothing was well alight. I got out again to put on my chute and tried to open the entry hatch but it was jammed. I then must have collapsed as the next thing I remember is falling in the air. I pulled the rip cord and made a fairly decent descent. I was captured 13 hours after the crash. The Bomb Aimer explained to me that the aircraft had exploded just after he jumped.”

**Citation :**

The Citation for the DFM awarded to Flt Sgt Judd is as follows : On his first solo operation, this NCO was Captain and pilot of a Halifax aircraft detailed to attack Stettin on the night of 21<sup>st</sup> April 1943. When flying at 500 feet at a distance of 220 miles from his target, the starboard inner engine was badly damaged by flak and had to be feathered. Sgt Rudd carried on, climbing from 500 to 12,000 feet and delivering a successful attack from this height. On returning to base, he carried out a successful landing under conditions of poor visibility. It is considered that this comparatively inexperienced pilot showed great devotion to duty and set a shining example, both to his own and other crews at this Station. He is recommended for the immediate award of the DFM. (LG 14/5/1943)  
Remarks by Station Commander :This NCO undoubtedly showed tenacity of purpose to a high degree. His determination to carry out the task allotted to him in spite of the possibility of further failure and the heightened of being shot down by enemy fighters because of his inability to keep in the main stream indicates marked courage and resolution, especially as this was his first operational sortie. The recommendation of the Squadron Commander is therefore strongly endorsed.

Remarks by AOC : I strongly recommend that the determination and courage shown by this young Captain be recognised by the immediate award of the DFM.

**Summary:**

Hurricane BN582 was detailed on 3<sup>rd</sup> December 1942 together with another Hurricane of the Squadron flown by Flt Sgt Perry (RAF), to do a non operational “beat up” on a Gun Post.

The two aircraft took off at 1019 hours with Flt Sgt Perry as leader and Flt Sgt Day his No 1. They headed south down the Hooghly River and found the gun post. The aircraft then carried out a number of ‘beat up’ attacks. On the 5<sup>th</sup> attack, Flt Sgt Perry followed Flt Sgt Day in at about 90 degrees and saw Day’s aircraft stall turn back to the gun post as he was just crossing it. When Perry had turned back on the target he saw a fire had started 50 to 60 yards from the gun post and flew over to see that it was an aircraft burning.

Army personnel were already by the crashed aircraft but could not get close because of the fire. Perry called base and then returned to base.

**Crew:**

RAAF      404924 Flt Sgt L K Day (Pilot)

Flt Sgt Day was killed in the accident and he is buried in the Calcutta (Bhowanipore) Cemetery India. The Bhowanipore Cemetery is 1km from the southern end of the Calcutta Maiden, and is enclosed by a high wall. The war plot is at the rear of the civilian cemetery about 200 metres from the main entrance.

**Summary:**

Vultee Vengeance AN810 was detailed on 13<sup>th</sup> April 1944 to carry out an experimental shallow dive practice bombing using bombs, in an effort to determine the best angle of dive for use in a forthcoming operation.

The aircraft took off at 1240 hours and after a preparatory circuit it went into a 70 degree dive from a height of 3000 feet approx with the dive brakes out. AN810 started to pull out at about 600 feet but 'mushed' downwards and hit the ground at one end of the airfield. The aircraft burst into flames on impact and was totally destroyed. Both Pilot and passenger were killed. Flt Lt Sandilands had carried out about 130 sorties against the enemy.

The Citation for the award of DFC to Flt Lt Sandilands is as follows :

Flt Lt Sandilands has served with distinction in both the European and Far East theatres of war. While based in England he took part in attacks on enemy shipping and intruder operations and was credited with the destruction of one enemy merchant vessel. In March 1942, this officer was captain of a Blenheim aircraft, which, in very adverse weather, kept a rendezvous with an aircraft carrier in the Mediterranean and successfully navigated some Spitfires to Malta. During the last eight months, Flt Lt Sandilands has completed a large number of bombing sorties against the Japanese, leading his Squadron on fifteen of these attacks. By his excellent leadership, fearlessness and determination in pressing home attacks, Flt Lt Sandilands has contributed greatly to the success of the squadron, (London Gazette 23/5/1944, page 2350)

Flt Lt Sandilands had two brothers who served in the RAAF in WW2 and lost their lives when attached to the RAF.

Vultee Vengeance AN942 on 21<sup>st</sup> November 1942 when flying from Cholavaram to Bangalore, crashed at approx 1215 hours between the Devangenthi and Malur railway stations when carrying out an emergency forced landing. Both the crew were killed.

A Court of Inquiry was appointed to investigate :

- the seizure of the front connecting rod due to lack of oil,
- the hitting of a high bank in an attempted forced landing, and
- owing to the very high stalling speed of Vengeance aircraft with the airscrew stopped and the steep attitude of the descent to keep above this stalling speed, that unless there is a particularly good area to force land baling out of the aircraft should be resorted to.

The citation for the DFC awarded to FO Hegarty is as follows :

FO Hegarty is an extremely capable and courageous captain of aircraft who has completed many successful operations. One night in June 1944 while on the outward flight to attack an important target in the Ruhr, the aircraft was attacked by an MR110 and severe damage was sustained to the electrical equipment and bombing gear. By skilful evasion tactics and coolness, FO Hegarty saved the aircraft from destruction. Continuing to the target, the aircraft was twice hit in the fuselage by anti-aircraft fire and on leaving the target, again suffered damage from the ground defences. Shortly after this, an ME110 attacked and on this occasion the navigator and wireless operator were wounded and further extensive damage sustained by the aircraft. Again, FO Hegarty's skilful pilotage enabled him to avoid destruction and by his determination and zealous application, eventually flew the aircraft back to the United Kingdom.

Flt Lt McLean has taken part in attacks on vital and heavily defended targets in Germany and occupied Europe. In December 1943, on returning from an attack against the German capital he encountered very adverse weather over the landing field. The navigation systems and the wireless communication system of the aircraft were unserviceable, and the aircraft hit an obstruction and burst into flames. Although injured himself, Flt Lt McLean helped to extricate his crew and despite this harassing experience, he immediately, on recovery, resumed operational flying with undiminished enthusiasm. An excellent captain of aircraft he has consistently maintained a high standard of efficiency and imbued his crew with his fine fighting spirit. (London Gazette 12/2/1946 Page 903)

Flt Sgt Tankard is buried in the Cambridge City Cemetery, Cambridgeshire, UK. The cemetery is known locally as the Newmarket Road cemetery.

PO McLean later reported “ We returned from the mission at approx 0045 hours, in the neighbourhood of the RAF Wyton drome over cloud with the SRA and Gee equipment U/S plus the TR 1196 receiver. Control was contacted by means of the Marconi equipment and a QFE obtained and set on the altimeter. Permission to land was obtained and I came through the cloud and crossed over the drome at 200 feet from south to north. While crossing I noticed a green flashed for me to land, and I commenced a left hand circuit preparatory to landing. Our height was 200 feet. I selected wheels down and was about to increase the engine revs when I noticed the ground. I attempted to level the aircraft laterally and gain height. The aircraft struck the ground slightly port wing low. I do not remember anything further.”

Flt Sgt Lindsay who broke an arm in the crash, still managed to pull some of the injured from the burning wreck and was awarded the BEM (Military Division).

**Summary:**

Manchester L7387 took off on the early afternoon of 12<sup>th</sup> February 1942 detailed to carry out an attack on German battle cruisers about 10 miles west of the Hook of Holland.

L7387 was attacked by two enemy aircraft directly from the rear, and the rear gunner of L7387 answered their fire. The aircraft attacked again and on this occasion the enemy aircraft closed to about 40 yards range. Both the rear and mid upper gunners returned the fire.

A third attack was made from about 150 yards by a single enemy aircraft. These attacks caused severe damage to L7387 as also did fire from the battleships and their escorts. L7387 flew over the battleships at 500 feet but was unable to open the bomb doors as the hydraulic system was damaged.

L7387 returned safely to base, but Sgt Whibley the rear gunner who had sustained injuries from one of the attacks, died of his injuries on 13<sup>th</sup> February 1942. The rest of the crew were uninjured.

On the 24<sup>th</sup> June 1944, WO Hooper, was on board a Japanese transport vessel approx 20 miles off the coast of Japan when it was torpedoed. The ship sank quickly in approx two minutes, and only 212 were able to escape from the hold. These survivors were in the water for 12 hours, before being picked up by a Japanese rescue ship the following morning. The transport vessel had left Formosa with 772 POW's of mixed nationality, including 17 RAAF personnel.

WO Hooper was not among the survivors. He has no known grave, and his name is commemorated on the Singapore Memorial which stands in the Kranji War Cemetery, Singapore.

RAAF 415531 Flt Sgt Heason, L W (Mid Upper Gunner)  
RAF Flt Sgt Sykes, E W (Rear Gunner)  
RAF Sgt Holloway, D L (Flight Engineer)

Following post war enquiries and investigations, it was established in 1947 that on 18 November 1943 between 1930 and 2000 hours, an aircraft had attempted to make a forced landing on Biedesand Island and it had been previously damaged. It collided with a tree and exploded scattering wreckage over a wide area.

In 1950, following exhumation of graves in Lampertheim Cemetery (8 miles north of Mannheim), the remains of Flt Sgt Sykes, Flt Sgt Ussher (RAF), and Flt Sgt Heason (RAAF) were identified. They are buried in the Durnbach War Cemetery, Locality bad Tolz, Bayern,.Germany.

The other four crew members have no known grave and their names are commemorated on the Memorial to the Missing, Surrey, UK.

<b>Unit:</b>	ATTD 91 SQN RAF

**Summary:**

Spitfire RM817 took off from West Malling drome at 2230 hours on the 26<sup>th</sup> June 1944, detailed to carry out an anti pilotless bomb patrol as Westwood White 2 with Lt De Bordas as White I and Section Leader. When an intercept was made and while White 1 was engaged in firing, ack-ack gunfire caused White 2 who was flying behind White 1 to break away and the section got separated.

White 2 was heard to ask for an emergency homing which he seemed to be unable to hear clearly, and instead of reaching base White 2 landed at USAAF Station Staplehurst where the aircraft was refuelled. After obtaining permission from flying control at West Malling to land at base, White 2 took off shortly after midnight and R/T contact was established at 0012 hours. All night landing facilities at West Malling were lit and at 0014 hours White 2 was seen from the Control tower approaching base from a south easterly direction, its navigation lights on and at a low height as cloud base was about 1000 feet.

Three to four miles from base when flying seemed quite normal, the port wing suddenly dropped and RM817 went down vertically and the aircraft was smashed on impact.

In his remarks on a Court of Inquiry into the accident, the RAF Group Commander stated “The pilot should not have been permitted to fly back at night to West Malling as it is close to a balloon barrage and the Spitfire Mark XIV is not a good aircraft to fly for night flying owing to exhaust fumes. There is nothing to account for the accident. A possible explanation is that while the pilot was looking intently to starboard to find base, he suddenly found the ground rising in front of him as it does in the place of the accident and he turned too sharply resulting in incipient spin. The pilot had done only 15 hours and no night flying in Spitfire Mark XIV, and the Group Commander directed that the Squadron CO, the Flight Section Leader and the Flying Control Officer should be reprimanded.”

**Summary:**

Spitfire JF333 took off from Bellaria airfield, Italy, at approx 1240 hours on 16th April 1945, to carry out a mission behind enemy lines and bomb enemy targets in the Medicine area. JF333 was flying No 3 in a formation of four aircraft.

No 3 dived down to attack a gun and was seen by others in the section to be enveloped in flames and explode on the ground. The Section Leader called his section to say No 3 had crashed when to his amazement PO Hoolihan himself replied "I'm OK have been hit by flak." On being asked what side of the lines he replied " on the Hun side, I think."

The Section Leader called up again a few minutes later but there was no reply.

It was later thought that the explosion seen by the Leader had been the explosion of a bomb released by PO Hoolihan's aircraft.

In 1945 an American party found the wreck of JF333 in a field behind Casa, via Stradone, near the village of Castel Guelf.

The Citation for the award of DFC to PO Hoolihan is as follows :

Throughout numerous operational sorties, POHoolihan has displayed a high degree of skill, gallantry and devotion to duty. In November 1944, while attacking an enemy strong post, his aircraft was hit by anti-aircraft fire and burst into flames. He flew over our lines when he was forced to leave the aircraft by parachute at a low level. On another occasion, his aircraft was damaged by fire from the enemy fire defences and he himself was wounded in the legs by splinters but undeterred he returned to the attack and destroyed the gun position. <b>Unit:</b>	ATTD 94 SQN RAF

**Summary:**

Spitfire ER663 on 5<sup>th</sup> January 1945, was involved in a large scale strafing operation of ELAS transport ordinance north of Athens, Greece. As Flt Sgt Andrews had only been in the unit for 5 days and had 6 hours flying practice strafing and local recce, the Sqn Ldr CO decided to accompany Andrews to give him any further instructions and assess his ability. His report is as follows :

“The aircraft took off at 1100 hours from Hassand drome and searched the area given sighting several transports already destroyed and abandoned, and dummy attacks were carried out on these. Andrews attacks were good and we proceeded further. At 1120 hours we sighted 3 transports north of Elevais. I instructed Andrews to orbit and watch while I carried out 2 attacks.

I reserved for Andrews one of the vehicles which was on the open road with unobstructed lines of approach and breakaway. When I had finished I instructed Andrews to carry out his attack on this vehicle while I orbited above. He commenced his dive, opened fire at about 400 yards, missed his target and pushed his attack too close obviously correcting his aim by his strikes. I called him to pull away but before the message was completed he had pulled out very low down. The aircraft appeared to ‘mush’ hit the ground and disintegrated. It is possible that the aircraft may have been hit by flak, although no flak had been sighted in the area.

He had been properly instructed to give short bursts at the correct range and pull out at least 200 feet above the target. About 1500 hours that day an Auster aircraft was sent out and his body was observed on the ground and a few ELAS troops were there.”

One day in November 1942, this officer led his squadron in an attack on a formation of Stuka bombers, heavily escorted by fighters. During the combat 7 Stukas were shot down, a further 8 probably destroyed and several others were damaged. Flt Lt Foskett, who displayed great skill and daring, destroyed 2 of the enemy aircraft before his own was hit. He landed safely, however, and rejoined his squadron the same night. The following morning he resumed his flying duties. This officer has participated in a large number of sorties and has displayed inspirational leadership.

**Summary:**

Halifax MZ464 during a practice flight of circuits and landings on 25<sup>th</sup> February 1945, crashed on a hill near Brantingham Brough, about 8 miles west of Kingston upon Hull, a few minutes after take off from RAF Station Leconfield, Yorkshire. All on board were killed.

After making two normal landings the aircraft took off for a third time at approx 1520 hours. The weather at the drome was suitable for circuits and landings, but in the locality of the crash very low cloud down to tree top level and drizzle was possible. After circling in cloud for several minutes above the hilly location, the aircraft seemed to come from a north westerly direction and strike some tall trees while attempting a steep climbing port turn to avoid them.

The opinion of the Court of Inquiry was that the accident was caused presumably by the fact that the pilot had entered cloud and was unaware of the presence of high ground over which he was finally flying while endeavouring to break cloud, and did not see the trees in sufficient time to avoid hitting them. The weather at the time was a contributory factor.

The aircraft exploded between Boissy-Sous-St Yon (Essonne) and Breux-Jouy-St-Yon, two small villages 7kms south west of Arpajon, France. Five of the crew were killed and WO Bethel was a POW and Sgt Pritchard evaded capture.

PO Giddings is buried in the Breux Communal Cemetery, Locality Essonne, France.

Breux is a village and commune 28kms south east of Versailles and 6kms south west of Arpajon. WO Webb is buried in the Boissy-Sous-St-Yon Communal Cemetery, Locality Essonne, France. Boissy-Sous-St-Yon is a village 28kms SSE of Versailles and 7kms SSW of Arpajon.

Flt Sgt Clement, FO McGill and Flt Sgt Seale are buried in the Souzy-La-Briche Communal Cemetery, Locality Essonne, France. Souzy-La-Briche a village and commune is 31kms south of Versailles and 10kms north of Etampes.

WO Bethel later reported “the aircraft was just turning to make a third run over the target to drop flares, when it was hit under the mid upper turret. The crew were ordered to put on chutes and this was acknowledged. After dropping flares the aircraft was again hit in both port motors and possibly elsewhere. The inter-com and lights were U/S. I went forward but could see no one in the aircraft. The escape hatch was open and the A/c full of black oily smoke. I tried to call out to the two gunners but the I/C would not work and the fire was burning fiercely. I know that Giddings, Webb and Pritchard all baled out safely and almost certain the two gunners had baled out as they were at the rear door early. I baled out at 6000 feet with the aircraft badly on fire but it seemed to be flying level. I think it crashed in the target area.”

PO Glasby has participated in many operational sorties against heavily defended targets in Germany including five attacks against Berlin. In October 1943, during an attack on Kassel, the mid upper gunner in the aircraft was taken ill. As this officer was assisting the gunner from his turret, an enemy fighter attacked the aircraft. It was largely owing to the accurate shooting of this officer that the attacker was driven off. Afterwards he showed skill and initiative in extinguishing a fire in the fuselage and repairing the damaged oxygen system which had been rendered useless. An outstanding wireless operator, this officer has proved a most valuable member of aircraft crew.

**Summary:**

Lancaster KM346 took off from RAF Bourn airfield on the night of 28/29<sup>th</sup> January 1944 detailed to bomb Berlin. Owing to heavy icing at 16,000 feet it was found necessary to jettison 4 x 500lb bombs in order to get height, causing too much loss of time. To reach the primary target, so Kiel was bombed as a last resort.

Considerable heavy and light flak and searchlights were encountered both north and west of the target, and the Rear Gunner was killed due to severe shrapnel wounds in the head. The H2S, flaps, undercarriage, starboard outer engine and brake pressure system were severely damaged by flak. The aircraft returned safely to base.

WO Bethel later reported “the aircraft was just turning to make a third run over the target to drop flares, when it was hit under the mid upper turret. The crew were ordered to put on chutes and this was acknowledged. After dropping flares the aircraft was again hit in both port motors and possibly elsewhere. The inter-com and lights were U/S. I went forward but could see no one in the aircraft. The escape hatch was open and the A/c full of black oily smoke. I tried to call out to the two gunners but the I/C would not work and the fire was burning fiercely. I know that Giddings, Webb and Pritchard all baled out safely and almost certain the two gunners had baled out as they were at the rear door early. I baled out at 6000 feet with the aircraft badly on fire but it seemed to be flying level. I think it crashed in the target area.”

The aircraft exploded between Boissy-Sous-St Yon (Essonne) and Breux-Jouy-St-Yon, two small villages 7kms south west of Arpajon, France. Five of the crew were killed and WO Bethel was a POW and Sgt Pritchard evaded capture.

PO Giddings is buried in the Breux Communal Cemetery, Locality Essonne, France.

Breux is a village and commune 28kms south east of Versailles and 6kms south west of Arpajon. WO Webb is buried in the Boissy-Sous-St-Yon Communal Cemetery, Locality Essonne, France. Boissy-Sous-St-Yon is a village 28kms SSE of Versailles and 7kms SSW of Arpajon.

Flt Sgt Clement, FO McGill and Flt Sgt Seale are buried in the Souzy-La-Briche Communal Cemetery, Locality Essonne, France. Souzy-La-Briche a village and commune is 31kms south of Versailles and 10kms north of Etampes.

WO Bethel later reported “the aircraft was just turning to make a third run over the target to drop flares, when it was hit under the mid upper turret. The crew were ordered to put on chutes and this was acknowledged. After dropping flares the aircraft was again hit in both port motors and possibly elsewhere. The inter-com and lights were U/S. I went forward but could see no one in the aircraft. The escape hatch was open and the A/c full of black oily smoke. I tried to call out to the two gunners but the I/C would not work and the fire was burning fiercely. I know that Giddings, Webb and Pritchard all baled out safely and almost certain the two gunners had baled out as they were at the rear door early. I baled out at 6000 feet with the aircraft badly on fire but it seemed to be flying level. I think it crashed in the target area.”

**Summary:**

Liberator KH254 collided with Liberator KG974 at Char Mahammadpur, Bengal on 21<sup>st</sup> January 1945. Both aircraft collided head on just after dawn when a formation of 16 aircraft from the Squadron was forming up for one of the biggest operation yet attempted. The squadron aircraft were forming up with aircraft from other Squadrons at a rendezvous point.

The rendezvous point was an island, and aircraft were required to make a left hand circuit at a height of 5000 feet when forming up. Difficulty was experienced by some crews in forming up as the island was enveloped by ground mist.

Both aircraft were fully laden with bombs when they collided at 0706 hours. There was an immediate explosion and a pall of black smoke. All on board KH254 were killed

 RAF Sgt S W Bury, (Wireless Air Gunner)  
 RAF PO Harding, F W (Mid Upper Gunner)  
 RAF FO Richards, J A (Rear Gunner)

A post war report by a Missing Research & Enquiry team stated “ The team had accounted for 36 of the 38 aircraft lost on the mission, but of the two aircraft not accounted for (including JA905), one had crashed at Halchter approx 10 miles south of Brunswick and the other at Hope which is 45 miles north west of Brunswick and on the direct route taken by the aircraft in an attack on Brunswick from England. It had been determined that these two aircraft were the two unaccounted for.

At Halchter the aircraft exploded in the air and crashed at 7pm on 14th January with all the crew killed. At Hope the aircraft crashed and exploded on impact. The remains recovered from the two aircraft could not be individually identified but there was no reasonable doubt that the remains were members of the two aircraft in question and they were buried in a collective grave at Hanover War Cemetery, Germany.”

Those killed are buried in the Rheinberg War Cemetery, Locality Kamp-Lintfort, Noordhein-Westfal, Germany. Rheinberg is 24kms north of Krefeld and 1kms south of Wesel.

FO Seage later reported” the aircraft was attacked by a night fighter. The first burst shot away the elevators and the port outer engine was on fire. The plane started to dive and I gave the order to bale out which was not acknowledged. The second burst raked the fuselage and set the port inner on fire. The plane was in a steep dive and I was unable to move because of ‘G’ pressure. Very soon the plane exploded and I was blown out at a probable height of 14,000 feet. The crash occurred about 10 minutes after the target. To my knowledge all the crew were in the aircraft when it exploded. The aircraft crashed in the vicinity of Russelsheim and about 5 miles from Oberstein. I had to be hidden owing to darkness of wood and undergrowth, but it was impossible to traverse in pitch dark. Early next morning I was seen and challenged by a German sentry.”

The aircraft encountered heavy flak on crossing the Dutch coast at a height of 21/22,000 feet. Evasive action was attempted but the port outer engine failed and soon caught fire. The bale out order was given and four baled out through the rear escape hatch. The aircraft crashed at Lagebericht (Noord-Holland) near Bergen.

PO Preston and Sgt Chadwick were killed, four were POW's and Sgt Fidler escaped capture.

Those killed are buried in the Bergen General Cemetery, Locality Noord-Holland, Netherlands.

Sgt Fidler later reported "I saw the Navigator, Wireless Operator and Mid Gunner bale out of the rear exit. Before I left by the rear exit I asked the pilot what height we were at. He replied 19,00 feet. The bombs were still on the aircraft when I left. I do not think we were hit by flak as I heard the Flight Engineer talking about the port outer when we were crossing the English coast when outward bound. The fire spread rapidly and I saw flames stream past the rear turret."

<b>Aircraft Type:</b>	Lancaster
<b>Serial number:</b>	ED 540
<b>Radio call sign:</b>	HW -
<b>Unit:</b>	ATTD 100 SQN RAF

**Summary:**

Lancaster ED540 took off from RAF Grimsby on 15<sup>th</sup> February 1943, detailed to carry out a high level cross country training exercise. The aircraft crashed at 1308 hours and caught fire after attempting to go round again at Grimsby airfield. Five of the crew were killed and two were injured.

A Flying Accident report on the crash stated “ After climbing on the first leg and approaching 18,000 feet, black smoke poured from the port outer engine, and the engine was feathered. It was presumed that the altitude mixture control needle had stuck and was resulting in too rich a mixture at altitude. If the engine had been switched on again just before landing it probably would have run perfectly normally.

The pilot approached to land with the port outer engine feathered. There was a strong and gusty wind blowing and the aircraft bounced on landing. The Pilot opened up to go round again and the aircraft flew straight for a short distance. When the aircraft reached 200 feet it went into a turn to port which increased very rapidly and the aircraft dived into the ground. The aircraft maintained insufficient speed to enable it to climb.”
